

# Visitors can find more than just superyachts on display

■ Boat owners can protect their vessels from above and below with the HoverCover FloatLift from Sunstream Boat Lifts, which is at the convention center. The HoverCover is attached to the high-speed, hydraulic FloatLift to provide boathouse-like protection. The HoverCover automatically lifts as the FloatLift lowers, making boarding a snap. When you return to the dock, the FloatLift raises the hull out of the water while the HoverCover lowers, providing snug protection for your boat.

**QUICK TRANSFORMATION:** The FloatLift and HoverCover from Sunstream provide protection from exposure to the sun and rain and eases boarding.
